

The Mexico City Legat's Oswald file, 105-3702 -

Processed 4/80, it was sent to me under date of 12/18/80 as processed for another, no time stated.

There are many referrals, esp. to CIA. Most of what is not provided is "previously processed," serials identified on processing worksheets so copies can be found.

There is nothing of any real consequence, nothing new in what is now disclosed.

There is unjustifiable withholding and some of what is withheld as b1 seems to be interesting.

Some of what should be in this file isn't and it isn't "previously processed." Such things as the investigation of the "Hunt" ~~letter~~ letter sent to ~~critics~~ critics from MxCity, where the earlier disclosures are incomplete.

No ref to any investigation of the intercepts tapes following the Kessler/Post story, or anything pertaining to the Rockefeller's Commission's interest(s). Not HSCA, Church/Schewiker committee, etc. Such records are probably filed elsewhere without copies in this file, where by practise, if not filing as mains, they should be.

Very little re Garrison and what little is clippings. No investigations.
