

To Quin Shea from Harold Weisberg King and JFK assassination records as well 1/19/80

Some months ago, when it was first published, I read William C. Sullivan's book. The former assistant director of the FBI says much that is pertinent to many of my appeals in both cases. I therefore began to write you about it, citing what I believe supports these appeals. Other work, particularly the needs of litigation, interrupted me and I did not complete what I started long ago. I have gone over it, made some corrections, and send it now. Below I indicate some of the topics:

- National Security claims
- Electronic and other surveillances, including
 - monitored
 - mail interceptions
 - burglaries
- Maclean/Reubin request
- Belmont/Chris Records operations
- Leaking (not all by Belmont)
- Information provided to other nations
- Cooperation of other police; their records disclosed
 - foreign
 - domestic
- Legats operational, via informants, etc.
 - London City office described as operational; its territory outside London
- Searches not made
 - Special File Room
 - Divisions
 - Hoover's files and file rooms
- Tammara request
- Could Lab test; the Lab's records
- Disciplining of Bie in JFK case
- Canada/Mexico information
- Gerald Ford (as FBI informer) - records not provided
