

To Quid Shea from Harold Weisberg King and JFK assassination records appeals 5/19/80

Some months ago, when it was first published, I read William C. Sullivan's book. The former assistant director of the FBI says much that is pertinent to many of my appeals in both cases. I therefore began to write you about it, citing what I believe supports those appeals. Other work, particularly the needs of litigation, interrupted me and I did not complete what I started long ago. I have gone over it, made some corrections, and send it now. Below I indicate some of the topics:
