Sonorable Ransey Glark The Attorney General Department of Justice Washington, D. C.

Dear Mr. Clarks

Sec. 1.

While previous correspondence with you has been less than remarding and, when answered at all, has been answered non-responsively, there is this difference between my writing you and my writing J. Hegar Heever: He never answers anything, responsively or otherwise, having refused to send me even a press release he himself issued falsely ab-

Because you are the Atterney General and because the motions of which I write are the responsibilities of the Democratic administration new about to leave office, I again address you about the improper withhelding that amounts to suppression of the evidence in the morder of President Kennedy. One of the things I would like you to bear in mind is "the entire bedy of evidence considered by" the Warren Coundation "bo preserved intact". This means that everything considered by the Countersion must be in the Mational Archives.

Among those things not in the Mational Archives are records under your personal control. This includes such items of evidence considered by the Coumission - in fact, basis to its conclusions - as the spectrographic analysis of the bullet and various frequents of bullet(s) said to have been used in the assassimation. Hen, after promilection of your order, I asked for this evidence at the Mational Archives, I was told it was not there. In my presence the Pedaral Bureau of Investigation was phoned and tald the Archives it was, citing a file. I seem proved this file was not failed to supply it. Mr. Meever just refused to answer my letter on it. This mest basis evidence is not covered by any of the guidelines, cannet properly be considered to be covered by the subsequently emoted "Preeden of Information Act", I believe I an embilied to it, and I ask you for it.

I ask you to recall that the PBI was the Genmission's unjer investigative arm and the supplier of its technical and certain analytical services. What it "considered" in this work it "considered" for the Genmission. Yet, in supplying what was identified as Genmission Decument 1465, it failed to supply certain of the essential evidence. On the page numbered 11 of this file, the concluding sentence reads, "The Identification Division further advised that the two latent fingerprints developed are not identical with the fingerprints of LEE MARVET OBVALD". The Mational Archives informs up they have no record of whose fingerprints these were. Astounding as it is to a non-expert that a piece of paper preserved fingerprints for so long a period of time, it is no less asteunding to no that when the FBI allegedly was looking so diligently for any Oswald accomplies, and it did have evidence of such an accomplice, it did not give the Commission the name or names of those whose fingerprints were found on the literature Oswald distributed in Hew Orleans. This information, which Mr. Clark - 2

2

should have been available to the Counissian, should have been an impertant part of its deliberations, also should now be in the National Arshives. It seems to be immune to proper withhelding. I ask you for a

On a number of occasions, FBI agents, acting as the Commission's investigators and for it, showed numerous witnesses various photographs. Some of these are not in the National Archives, and usually it is impossible to relate the pictures with the investigative reports, so it is not possible to know which pictures were shown which witnesses. I ask that you have this defect remedied, that a complete file of pictures, each identi chives and there made available in the usual manner.

I also ask that this include each and every one of the photographs obtained by the FBI and not given the Commission, not put in the Commission files, not reported to the Commission and in the full, unedited form sim larly be added to the "intast" evidence in the Matienal Archives. In this connection, I want to single out but three of the very large number of still and motion-picture photographs fitting this description and of which I desire copies. One is the first of two Polaroid pictures taken h Mrs. Mary Moorman, of Dallas, Texas. A second is the motion-picture take by the miner sen of J. Pat Deyle, of Portland, Gregon. Another motion picture is that taken by John Martin, of Minneapelis, Minneseta, The latter two are Sum, movies. My own evidence convinces me each was edited Meither was given the Warren Commission, whose files de not even reveal the existence of that taken by Mr. Martin. Both show, or in the form given to the FBI showed, Oswald's literature distribution in New Olleans leading to his arrest on August 9, 1963. This was the subject of an estensive FBI investigation. I ask that what is deposited in the Matienal Archives include everything removed by the FBI before the film was returned to the owners, in the form of copies, if that does not exist in the originals, which were retained by the FBI.

I further ask that you cause to be deposited in the Matienal Archives those pertinent reports of interviews with witnesses that were withheld from the Commission and/or are not in its files. I have the statements of witnesses so interviewed, where there is no report in the Statements Archives and where there is mecrecord in the files of the Commission of the existence of the reports.

I am aware that the Attorney General, like any busy executive, can become the creature of those upon whom he depends for complete and dependable infermation. I believe I know what has not been communicated to you. am confident history will record as a record with which you may not be content, I am willing to offer you any help I can. Should this informait will be a considerable reflection upon you personally, the administration of which you are part, and the Democratic Party.

There remains unanswered correspondence between us. I would appreciate responsive reply as soon as possible.

Sincerely,

Harold Weisberg
