JFK assassination records appeals  
Files not searched  
—Records not provided

Harold Weisberg 9/30/79

In a Not Recorded Serial of 9/28/64 from M.A. Jones to Mr. DeLoach it is disclosed that the FBI, meaning DeLoach's special part of it, monitored the TV coverage of the Warren Report, which was issued the day before.

Such records are of considerable historical importance.

They have not been provided.

The apparent reason is that the actual records did not reach any of the files searched and possibly are kept in the special DeLoach/Grine Records files.

There has been no compliance from any such files in any of my cases or in response to any of the FOIA/PA requests.
