

Referrals - affidavits

Dear Mr. Shea,

10/4/79

Your letter of October 1 forwards several DEA documents that appear to be part of the FBIHQ 62-10960 file.

The Serials are visible on the first two only and in part on a third.

This is because the xeroxing was lopsided, eliminating part of the right margins.

As you know I try to keep the records exactly as I receive them.

While I have Ms. Barrett's help I am placing referrals when they are acted upon in the Sections from which they were originally withheld.

I would appreciate having the Serial Numbers of these documents so I can have them filed properly.

Your presumption that under most circumstances I am in accord with the withholding of the actual indentifications of symbolled informants is correct and I have no objection to that withholding in these records.

Sincerely,

Harold Weisberg
