JFK assassination records appeals      Harold Weinberg 11/21/79  
Files not searched - Jack Ruby  
Filed offices - Dallas and New Orleans  
Records provided to others and not provided to me

By means of a recent press inquiry related to Jack Ruby and his alleged mob connections (Carlos Marcello and others) I have learned of records provided to others and not provided to me, records not filed in the main Ruby files, to which searches and compliance were limited in what has been provided to me from HQ and the field offices. As best it is possible to search the records provided to me, in the continued absence of the index, the record identified below is not included.

It is a 1/13/64 Dallas airtel to Director, HQ 62-9-12, Dallas 94-558-FUB. Neither file number is familiar to me. The subject is the Criminal Intelligence program, a Dallas report on it. It refers to a prior Dallas airtel, of 11/16/63, which I do not find in the Ruby records provided to me.

As described to me the content relates to Ruby and mob figures, including Carlos Marcello, who is within the territory of New Orleans, as Dallas allegedly is within his territory.

Obviously any alleged connection between Ruby and the mob was supposedly thus within the FBI's JFK assassination investigation and thus is relevant. Moreover, it is much more relevant after the HSCA's report.

In the arbitrary, capricious and knowingly inadequate limitation of searches of files, which excluded known relevant files as I've already established in prior appeals, the FBI assured non-compliance, particularly in the field office cases. As described to me this is another illustration. (I do not have a copy of the records referred to herein. I have a description from one who says he has been there and from the specifics provided I believe has seen them.)
