

To Quin Shea from Harold Weisberg, JFK assassination records appeals 6/21/79
Searches at FBIHQ and Dallas

Attached 62-109060-5072 ^{is} ~~is~~ the covering airtel for an enclosure ^{three} ~~six~~ copies of which were sent to FBIHQ and 2 to Dallas, with 89-43 indicated as the Dallas file. FBIHQ is addressed in terms of the equivalent file at FBIHQ, 62-109060. The number of copies of the enclosure varies up to six. The designated file is in all cases the assassination file.

A notation added in hand attracted my attention. It ~~says~~ is not clear but does refer to something "detached for case file."

This is an FBIHQ record. With all copies allocated for the case file or what is represented as the case file and with no file number provided for the notation, there is the suggestion that something other than 62-109060 X at FBIHQ and/or 89-69 at Dallas is referred to as the case file.

This raises a question of the thoroughness of the searches and I believe requires identification of what is meant by the hand notation added to the record.
