

To Quin Shea from Harold Weisberg, JFK assassination records appeals
Searches

6/30/79

One of the earlier records in the FBIHQ Oswald file, Serial 65, of 11/30/63,
is a teletype to all SACs.

As the attached copy indicates, this communication holds forth the possibility
that relevant records had been compiled prior to that date other than under either
the Oswald of assassination captions.

I recall no searches or compliance from any such other files except for the
providing of part of the N.O. FPCC file.

This is an historical case. Many attachments are missing or said to be missing.

Good faith as well as historical case requirements should have led to the searches
of and compliance from all relevant files.

In this instance I remind you that I have a separate request of going on four
years ago for all Oswald pre-assassination records.
