

Dear Emory (and others),

1/22/81

I've finally gotten film copies of what the FBI claims is "all" the JFK spectro plates. I don't believe them. In addition, as you will see, ~~xxxxxx~~ almost none are properly identified, as with Q numbers. However, I'm sending you xeroxes so that you can compare them with the copies you got long ago.

I do not recall any testing done 3/24 or 4/13 or 12/4 or 3/20 or 12/6, as these indicate. If you (or others) can think of what was tested, besides the JBC clothing, I'd like to know.

These are xeroxed two to a page because they were printed on film that way, in some cases with the scotch tape visible. (like the one on top, where it is visible in the xeroxing.)

We filed a Motion to Compel on these, they provided them and now are claiming mootness again.

Best wishes,
