Lah ( JFR- HAA-Spettro)

Ar. Thomas H. Bresson, Chief ROIPA Branch FMI Washington, D.C. 20535 W17/60

Dear Mr. Breezen.

The third yaragraph of your letter of the 11th is preventive for what it does may as wells as for what it does not may.

You do say that these records are, between them, MERLIS Serials 5914 and 5930.

You also say that you have provided them "at they appear" in the FRU's reading room.

But you do not may that as they appear in the reading room in identical with as they appear in FRI files.

I would be provided with all non-enough MARCH records, not those that the PHI would place to the reading rows. Obviously, there can be pages to ensemblined records that were not placed in the reading rows and there is no apparent seems of determining this. You have not provided capter of both periods in full I appeal the middelings and with this case in court I would have been free you promptly about this.

Your latter door not identify times too socials as what the FAI calls that, believe.

Your latter also does not state that these two bullion are all the NASAN bullion, and
they are not.

Et, when I am to have required all hands buildes you letter falls to state that I have, and if I have not, that also I appeals again, I would like to be informed promptly.

It is interesting to see that you throw in an impolementy in a memor that permits the suggestion that I have received all saterial referred to in "Iou have previously been provided with approximately 160 pages of laboratory documents that deal specifically with ballistics tests, neutron activation analysis, spectrographic enalysis . . . " anyone reading your letter, without detailed knowledge, as a judge might lack detailed knowledge, could enally assume that I have "specifically" received all such information. In fact I have not. This was outsidiated when SA John W. Kilty was deposed last your in this case.

He was then represented by the same William G. Cole, to whom you refer, occampented by Lagal Coursel Division SA Jack Slicks, both of whom therefore have personal knowledge.

For your information, the metericle included within your language are within the specific Items of my 6/15/75 request and its Kilty provided on affiderit attenting to full out complete compliance, which I promptly disputed moder cath. By millionate identifies pertinent and sittied information. If my recollection is correct it also identified SA Mility as a specialist in providing inscrease and incomplete information under eath, a specialty in which he done not major a manufacture.

Four is sore years later 35 Mility Clapsted himself under eath. This is not unique,
for I have known him to contradict himself under eath on empther escention, when he use in
both contradictory vermines disputed under eath by emother (then settined) UA, she had
personal insulation.

The PHE did not dispute by affiliavit. Instead it riceses lied and to this day con-

It is now shout a year since Sk Kilty enhancing on the existence of records that still are not provided and are included within your quoted language.

Ends includes the specimegraphic plates. It leckedth agreed two years ago that they would be provided in this end the JK case. They still have not been provided in cities.

This includes most of the Mil records, as my affidewit identified them.

Tou should remember my knowledge of the nature and extent of NAA records from your personal participation in my C.A. 75-226. That bould, still in court, in the first filed under the smended Act. Saulier, as C.A. 2501-70, it had much to do with the amending of the Act, as I am certain you should recall. The new sait different from the old suit in that it also includes all NAA records pertaining to the JFK assessmentation investigation. This was because no available record reflected the fact that the FBI did perform NAAS in the JFK case when C.A. 2501-70 was filed. But when compliance was alleged in C.A. 75-226 although? was not provided with any NAA information, you explained this by claiming I did not desire it. Your interpretation, that I assesded by the appeals court twice. (This is not

a record. The first suit was there three times, as well as to the Supreme Court. If you had reviewed all pertinent records, including those you still have not provided, you would have noted that after the first of the five oral agreements before the appeals court but prior to its decision the Department recommended mosting that case.)

Your 6/11 letter size includes "Mailistics tests." In the King case, C.A. 75-1996, which includes all such influention, the FMI states that it did not test fire the co-called buy wills, which the FMI refers to as the death mills. However, the published records of the House Select Consistes on Assessmentians state that the FMI did test fire that mills, which, emissaily, one would have assumed. The consistes pieces that it obtained the toot-fixed speciment from SA Courtlandt Canadagham. Unless the consistes in in error the FMI appears to have mished the Court in C.A. 75-1996.

By commond, reschafied Mr. Colo that Sk Killy had tentified to the existence of pertinent and withhold information a year ago, that it still had not been provided, and he again named for its (as I state above, Sk Shidas also had personal knowledge.) as of the last and there still has been no responsed by first requests were in 1969. The same information was requested again on 4/15/75. The existence of pertinent and withhold information was confirmed by the FM theself under both in 1978. I therefore under about pour selection of language that in, conscribilly, irrelevant on august 11, 1980.

For your additional information, your analyst on this case, Fe. Counts Fruitt, temberied on cross examination only the day before yestering that the FMI had nower asked for chariffication of this are any either of my information requests.

In my direct quotation of your language/that I describe as excentially irrelevant

I entitled "the examination of eigeratte butts." By request included those found in Atlanta.

In response 5% Kilty attested that none were found there but once were found in New Orleans.

I have since learned that in fact discrette remains appear to have been found in Atlanta,
in the May remains house matter than in his car, in the interest of specing this long-delaye

case to a removable conclusion I ask for nothing further about discrette recains.
