Er. Chomas H. Bresson, Chief FOLPA Brunch FML Washington, D.G. 20535

8/17/80

Dear Mr. Brosson,

The third paragraph of your letter of the 11th is proveentive for what it does may as wells as for what it does not may.

You do say that these records are, between them, MUNIA Serials 5914 and 5920.

You also say that you have provided them "as they appear" in the PAU's residing room.

But you do not say that as they appear in the reading room is identical with as they appear in PAI files.

I would be provided with all non-exempt NURELE records, not those that the PEI would place in its reading room. Obviously, there can be pages in unsertained records that were not placed in the reading room and there is no apparent means of determining this. You have have 3936 pages bearing only two numbers. If you have not provided captes of both serials in full I appeal the withholdings and with this case in court I would like to hear from you promptly about this.

Your letter does not identify these two socials as what the FAI calls them, buildes.

Your letter also does not state that these two buildes are all the NUMBER buildes, and they are not.

So, when I am to have received all Merkin belies your letter falls to state that I have, and if I have not, that also I appeal. Again, I would like to be informed promptly.

It is interesting to me that you throw in an irrelevancy in a manner that permits
the suggestion that I have received all material referred to in "You have previously
been provided with approximately 100 pages of laboratory documents that deal specifically
with balliotics tests, neutron activation analysis, spectrographic analysis . . . " Argone
reading your letter, without detailed knowledge, as a judge eight lack detailed knowledge,
could easily assume that I have "specifically" received all such information. In fact I
have not. This was established when SA John V. Kilty was deposed last year in this case.

He was then represented by the same William C. Cale, to them you refor, accompanied by Legal Command Division SA Jack Slicks, both of show therefore have paracolal knowledge.

Jow your information, the majorials included within your language are within the specific Items of my 4/15/75 request and SA Kilty provided an affident's attesting to full and complete compliance, which i promptly disputed under cath, by affidavit identifies perdoent and withheld information. If my recollection is correct it also identified SA Kilty as a specialist in providing insocurate and incomplete information under path, a speciality in which he does not enjoy a monopoly.

Four or more years later 36 Killy disputed identify under oath. This is not unique,
for I have known him to contradict himself under oath on emother occasion, when he was in
both contradictory versions disputed under oath by another (then retired) 5A, who had
personal knowledge.

The Fill did not dispute my affiliavit. Instead it stonevalled and to this day con-

It is now about a year minos SA Kilty adminished the existence of records that still are not provided and are included within your quoted language.

This includes the spectrographic plates. SA Beslevith egreat two years ago that they would be provided in this and the JFK case. They still have not been provided in either.

This includes most of the MAA records, as my affidavit identified them.

You should remember my knowledge of the nature and extent of NAA recercle from your personnal particulpation to my C.A. 75-225. Thethemit, still in court, in the first filed under the exemded Act. Section, on C.A. 2301-70, it had much to do with the securing of the Act, on I am cortain you should recall. The new suit different from the old suit in that it also includes all NAA records pertaining to the JTK measurabantion investigation. This was because no available record reflected the fact that the THI did perform NAAs in the JTK case when C.A. 2301-70 was filed. But when compliance was alleged in C.A. 75-226 although Hes not provided with any NAA information, you explained this by claiming I did not decire it. Your interpretation, that I amended by the appeals court twice. (This is not

a record. The first out was there three these, as well as to the Supreme Court. If
you had reviewed all pertinent records, including those you still have not provided,
you would have noted that after the first of the five oral agreements before the appeals
court but prior to its docision the Department recommended scatting that case.)

Your 8/11 letter also includes "Sallistics tests." In the King case, C.A. 75-1996, which includes all such importation, the FRI states that it did not test fire the so-called Bay mile, which the FRI refers to as the death mills. However, the published records of the House Select Constitute on Assassinations state that the FRI did test fire that mills, which, ordinarily, one would have assumed. The constitute state that it obtained the test-fired specimens from SA Countlands Comminghes. Unless the constitute is in error the FRI appears to have sdaled the Count in C.A. 75-1996.

My counsel reminded My. Colo that SA Kilty had testified to the existence of partiment and withheld information a year ago, that it still had not been provided, and he
again asked for it. (As I state above, SA Slicks also had personal knowledge.) As of the
last sail there still has been no response. My first requests were in 1969. The same
information was requested again on 4/15/75. The existence of partitions and withheld
information was confirmed by the FMI itself under oath in 1979. I therefore square about
your selection of language that is, essentially, irrelevant on August 11, 1980.

For your additional information, your enelyst on this case, its. Conside Fruitt, testified on cross executation only the day before yestering that the Fill had never asked for planification of this or easy other of my information requests.

In my direct quotation of your language/that I describe as assentially irrelevant

I emitted "the examination of digaratto butts." By request included those found in atlanta.

In response Sa Eilty attested that none were found there but sees were found in New Orleans.

I have since learned that in fact digaratte remains appear to have been found in atlanta,
to the May resolute house rather than in his car. In the interest of specing this long-delayed

case to a removable conclusion I ask for nothing further about digaratte remains.
