

JFK assassination records appeals

Harold Weisberg 8/15/79

Unjustified claims to exemptions by historical case standards

I had not intended to make a copy of this record but did ~~by~~ accident so I provide it. The reason I did not intend to make a copy is because by now I have provided more than a fair sample of arbitrariness, capriciousness and inconsistency and failure to even consider the standards for historical case processing and the AG's 5/5/77 FOIA policy statement, which the FBI has always ignored.

In this case what is withheld here is disclosed elsewhere: Strickland, as I recall.

This is probably the first page only of a longer record.

I fear for the problems being created if this kind of processing is inflicted on the indices.

And the costs the FBI would be creating with the problems.

*Harold Weisberg*
