

JFK assassination records appeals
Sommerville/Wiltner withholdings
Ticklers

Harold Weisberg 8/3/79

To what I have already provided relating to the FBI's own files disclosing that this matter was within the public domain and to the falsity of the contrary affidavit the Department filed, executed by SA Horace Beckwith, please add the enclosed 62-109060-6587 .

As you will see, at FBIHQ the names of these men were indexed from this record, which reports what appeared in the New Orleans newspapers 10 years before the FBI's withholdings and persistence in withholding as represented by the Beckwith affidavit.

From NEI's instant knowledge, reflected in the note on page 2, there appears to be this further indication of a tickler not provided.
