To Gain Shea from Harold Weisberg, King assassination records appeals 6/2/80

Appeals pertaining to
abstracts

David and Shirley Gaines
Morris Davis.

With the other enclosures and the two attached appeals pertaining to the Gaines and David I believe I have come to the end of those pertaining to the abstracts or to which my attention was directed by reviewing the abstracts. There may be one or two Ms. Barrett has not checked but until she returns I will not know.

I regret it was not possible to provide this information in a more systematic and structured manner and that I was interrupted so often while working on it. I hope that the captioning may be of some assistance.

There is another set of abstracts. It should be searched for those said to be missing. There really is no point in the Department's persisting in its false pretense that there is but a single set, in part because its own publication explains why there are duplicates and the copy provided to me was xeroxed from the carbon copy.

The stamped date on the FBI's letter to me, responded to under today's date, did not come out in copying. It is May 30. What that letter really says is that the FBI claimed to have disclosed as previously processed an admittedly withheld 2369 pages.
