JL-

This is Jerry's face-saving nonsense, rather mild for him and responsive to nothing at all.

His reference to his new career in "Journalism" is to his nonexistent involvement in the NSRP's substitute for The Thunderbolt. Imagine how sick he is in the head to pretend that illiterate that he is he is doing that! He sent me the first issue.

It seems that lots of things were in Fields' name and with them suing each other they, meaning the NSRP, can't even use their own post box number!

He'd phoned me before he had time to receive the letter in which I told him I would have nothing more to do with him. I told him I'd written this letter and I hung up on him. He dates this letter the 4th, but it had an Atlanta postmark of the third on the envelope.

I wonder if they also lost the name of the party because he used to use their envelopes and this time he didn't.
