

2. This factory employs 2000 workers in three of the five main shops mostly these shops are filled with conveyor belts in long rows, on either side of which sit the long lines of working women.

500 people during the day shift are employed on the huge stamp and pressing machines here sheet metal is turned into metal frames and cabinets for televisions and radios.

another 500 people are employed in an adjoining building for the cutting and finishing of rough wood into fine polished cabinets. a laborious process mostly done by hand, the cutting turning all the process right up to hand polishing are carried out here at the same plant. The plant also has its own stamp making plant employing 150 people at or assisting at 80 heavy machine lathes and linders. The noise in this shop is almost deafening as metal binds against metal and steel saws cut through iron ingots at the rate of an inch a minute. The floor is covered with oil used to drain the heat of metal being worked so one has to watch one footing, here the workers hands are as black as the floor and same to be eternally. The foreman here ^{looks like} the Russian version of "John Henry" tall and as strong as an ox he isn't fully but he gets the work out.

The plant has its electric shop where those who have finished long courses in electronics work over generations television tubes, testing equipment of all sorts the green work tables are piled high here. Electric gadgets are not so reliable here.

Mostly due to the poor quality of wires which keep burning out under the impact of the usual 220 V. line voltage. in the US its 110 V.

The plastics department is next, here 47 women and three physically disabled persons keep the red hot liquid plastic flowing into a stack of old presses turning out their quotas of knobs handles non-conducting tube shoes, and so forth. These workers suffer the worst condition of work in the plant, in otherwise model factory for the Soviet Union. Due to bad fumes and the hotness of the materials, these workers are awarded 30 days vacation a year, the maximum for workers.
