

most workers in Munich come from peasant stock while repopulated the city at the end of the 2nd war. Like most Russians they are warm hearted and simple but often stubborn and untrustworthy.

The life of the "kollektiv" or rather with life since it often touches upon more than just the work, is the most reflective side of the complex working of the Communist party of the USSR. It is the reflection of mass and organized political activity, ~~and~~ determining the actions of every individual and group, placing upon society a course, so strict, so disciplined, that any private deviation is interpreted as political deviation and the enforced course of action over the years has become the most comprehensive educational and moral training probably in the history of the world.

To understand the work and workings of the "kollektiv" one must first ask who controls who leads the "kollektiv" the answer is that it is a long one, all plants and factories in the Soviet Union have party committees headed by one greater of a higher party school whose function is to control discipline of members of the Communist party and who, working in conjunction with the directors of the factory, ~~you might say~~ all factors pertaining to the work, allocations, and production of any given line. It must be noted ~~that~~ officials of the party man occupies a position ~~equally~~ equal to the supreme head of any factory, ~~but~~ the party man that he has had to the fact that Communism holds the leading positions in plants that the party man holds considerable moral sway over the activities of the workers - they regard it as no suggestion of the party man is ever turned down by the directors of our factory, that would be president to treason. The party man designates who shall be shop and elected party secretaries a post well coveted by employed Communist - these Communist virtually control every move of "kollektiv" they are responsible for the carrying

of all directives pertaining to meetings, lectures, and activities in their local cells. Meetings or "Gobranias" are almost always held in the evenings or nights working hours. The nature of a strictly political nature is not that on an average 10 meetings are held in a month. If you have "young Communist" and the "General Trade Union" also monthly meetings. None of these are

held in month or by political as to two hours held every week
