CP Urges Support To Cuban Relief

THE COMMUNIST PARTY of the USA issued the following statement last week in connection with the disaster caused by Hurricane Flora in the Caribbean:

"The devastation caused by Hurricane Flora in Cuba and Haiti and the great loss of life, dislocations and economic hardships have called forth a great wave of solidarity in all parts of the world, including people of our own U.S.

"A number of people's organizations are already moving to collect funds, food, clothing and urgently needed medicines. Trade unions have announced donations as an expression of humanity and solidarity."

"We call upon all members and friends to be in the forefront of this activity and to spur their organizations for the collection of urgently needed aid."
