Res: J. D. Tippett
Dallas Police Depart.

Gentlemen:

The following is a medical report on the above named patient last seen by me in my office on 1/7/59.

Re-examination this date reveals good range of motion and very little crepitation of the articular surface on active motion. It is felt that in view of the good range of motion and no joint effusion, x-ray be postponed until next visit. It is recommended that he not do activity of crawling on his knees, such as laying floor, etc. This is not essential in his job, therefore should be of no concern. He is to continue quadriceps exercise and continue full activity as is and report back in six months for x-ray, AP and lateral of the right knee and a tangential view of the patella to show the articular surface. Further indications on re-examination.

Trusting this brings your orthopedic record on this patient up to date, I am,

Very truly yours,

HAM/pds

HAROLD A. MATTHEW, M.D.
