

Debunkers Of JFK's Death Told Real Evidence Needed

DALLAS (UPI)—The third Dal Burleson, the young 1963, was an anniversary of President John F. Kennedy's assassination. Bills Ruby, who took it upon himself next Tuesday and if there is to be a Warren Commission has told Texas investigators would like to see the evidence.

"Somebody needs to go searching on behalf of the Warren Commission," Assistant Dist. Atty. William Alexander said. "If any of these debunkers can bring up evidence we can put on the witness stand, we will erect a monument to them."

Alexander meant the flood of books, articles, lectures and statements charging the Warren Commission was wrong when it concluded on the basis of 532 witnesses that Lee Harvey Oswald, acting alone, killed Kennedy.

Alexander believed any new investigation would turn up nothing new and that because after three years witnesses will "contaminate"—fill in the blanks with what they think should have happened—it might even get some misinformation in the record.

Oswald's mother, Mrs. Marguerite Oswald, is against opening an "immediate" investigation but for different reasons than Alexander.

"I think that critics, along with myself, have enough contradictory evidence to warrant reopening the case," she said. "But I don't think an immediate opening is necessary."

"Because as the Warren Commission was too fast, I am afraid that if the case is reopened now, this would apply to the other side. I think we should go a little slower and accumulate as much factual evidence as possible to break the case."

Mrs. Oswald, who lives in Fort Worth, is not convinced her 21-year-old son was guilty and it galls her that since the Warren Commission report was made public, newspapers call him the "assassin," not the "alleged assassin."

Texas Atty. Gen. Waggoner Carr, who was close to the Warren Commission, opposes any new investigation and believes the commission's report was both thorough and accurate.

"Since the Warren Report was made, we have stood ready to additionally investigate any new development, but there has been none to my knowledge."

Burleson said "I think the Warren Commission did a thorough and complete job."

Because of Ruby's new trial, Police Capt. Will Fritz will not talk about the case.

Fritz is in charge of the Dallas Police Department's homicide division. He has an almost legendary reputation for locating murder cases but was never able to get Oswald to talk.

Police Chief Charles Fritch, Jr. supports the commission's conclusion that Oswald killed Kennedy unaided, but will not discuss the report as a whole.

When Oswald fatally wounded Kennedy, he almost killed Texas Gov. John Connally. Connally, now recovered, never talks about the case without emotion. However, he declines comment on those who criticize the Warren Report. He was elected to a third term Nov. 8.

Oswald also killed Patrolman J.D. Tippit. His widow, Marie, who received more than \$50,000 in public donations, moved this summer to a larger home with a swimming pool.

When she did, she told a contact in the police department that she would not leave even an unlisted telephone number with the department and that she did not want to talk to any reporters.

Extended weather forecasts indicate next Tuesday will be hot, just as Friday, Nov. 22,

A ceremony will be held at 11 a.m. Tuesday by two 500-pound bronze plaques mounted on a curving granite marker above the assassination site at the entrance to the triple underpass.

Nurses at Parkland Hospital, where the President was pronounced dead, will hang a wreath on the door of Trauma Room 1, to which he was taken. The room will be arranged as it was when Kennedy arrived and the door will be closed. Unless the other three trauma rooms in the hospital's emergency department overflow, Trauma Room 1 will not be

tused next Tuesday. Mrs. Marguerite Oswald will observe the third anniversary of her bereavement Thursday in Rose Hill Burial Park, near Fort Worth, by visiting the grave of her son.

It is the greenest grave in the cemetery. Mrs. Oswald planted "golf course" grass on it and waters it almost daily from a hydrant.

Oswald's widow has been married almost 18 months to Kenneth Jess Porter, a former electronics factory foreman by whom she has had a son. She is convinced Oswald killed Kennedy and as far as is known, never visits his grave.
