

Of course, the General Walker case-file may be in permanent record storage or inaccessible to verify actual final record. Tho a duplicate file could be rendered the Federal Commission.

Other cities, too }

I trust these angles will be kept in mind. Turning it all over to the Federals, Chief, is overlooking the police duty and responsibility of the City and State to prevent such a Communist (or otherwise) subversion. I believe the City Police, Rangers, Highway Patrol could confer and 'follow-thru' on such activities; maintaining surveillance; and an active interest in the doings of this inimical group; swapping notes and cooperating within the Law! (Using computer tabs program.)

Perhaps a gun registration law is required to aid Police Department. Suppose a check-up on Commies, after the Walker incident, had turned up these assassin's articles? You could have issued search warrants for illegal guns & had your man or, at least, seized his weapons. And prevented a tragic disaster.

I'm sure, if put to a referendum vote, supported by C of C and other civic and community and fraternal organizations, such a law could be invoked. Confering with District Attorney as to prosecutable grounds and making a list of ^{realistic} charges and penalties may aid in stamping out this insipient 'fire in the forest' of these Law-breakers, Commie or otherwise.
