September 9, 1968

Lieutenant J.C. Day  
Dallas Police Department  
Dallas, Texas

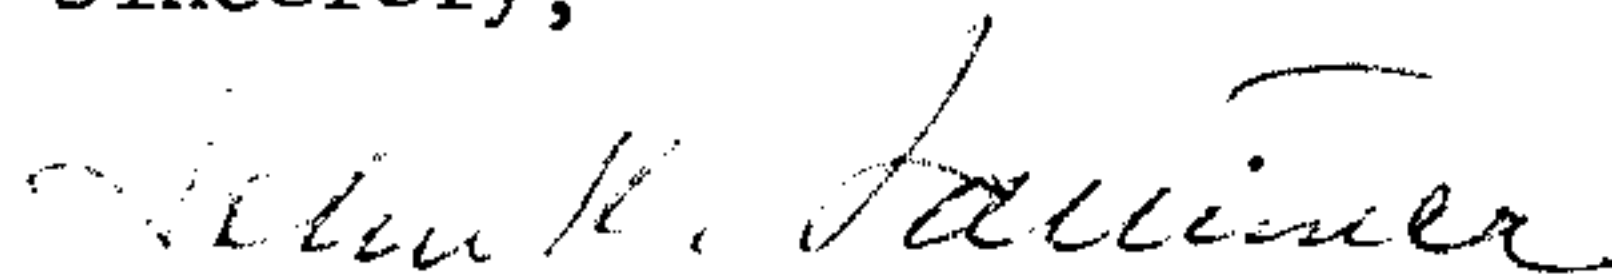

Dear Lieutenant Day:

I am a medical historian, naturally interested in forensic questions raised in connection with the Kennedy assassination. In reading the Warren Commission Report, I see that you photographed the three empty cartridge cases as they lay on the 6th floor of the Texas Book Depository Building, after Oswald fired them.

Can you tell me where the empty cartridge clip was found? Was it on the floor under the window from which Oswald fired, or was it still in the rifle until Captain Fritz ejected the last round? I have not been able to find out this fact in the Warren Commission Report, and am appealing to you for clarification of this point.

As evidence of the bona fide (and sympathetic) nature of my interest, I offer as a reference, Dr. Paul Peters, of the staff of the Parkland Hospital, who would be glad to act as a reference for me

Sincerely,

John K. Lattimer, M.D.  
Professor of Urology  
Chairman, Department of Urology
