

My troubles started in West Europe, I have never been in a country known as Communist. Who then is doing this?

My contact with Russians has been very slight. Although I have seen Russian films and know from other sources that they are a rough, crude, bumbling, ignorant people, only once in these two years of endless persecution was ever a Russian put after me; and he ended up in a terrible fright. I tricked him.

Who then is the acting intelligence directing all this and causing all our troubles today, including the negro troubles? Those negroes are an easy-going people, seeking trouble with no one; but now they have someone abetting them and teaching them to cause trouble.

This negro trouble is the biggest bonanza the enemy has found. What?
