

Note

For well nigh a century of personal ~~statement~~ research and experience has been <sup>out</sup> proving & building this improving science of humanitarianism, it hasn't been as importantly seen attentively as it warrants. Sorta like the times of Babylon etc. in the past when a new trend of improving truths were due to be accepted without chaos; but would be confused disastrously as Days of Noah etc. symbolizes with consequential torrential disasters; like more recent disasters of upheavals of present century began, in wars, crime, urage etc. increase & this tragedy as we've invitingly offered remedial science...but ~~scuffed~~ mostly false-accused & prosecuted for our rewards. Course, our personal joy, health & minimal needs nevertheless are protectively appreciated any way as we maintain integrity in offering its enlightenment of whole salvation of mates...similarly as then...and rather than disintegratively thinking-creating havoc of prematurely destroying bodies ..... to save(sic)souls, only? Which subversiveness of natural-sciences thus, hide the more potential and easier-like; while infectiously self-striving selves & spreading devious-unnatural-ideas basically unnoticed creating hate between mates and the opposite sex....competitively, Whence stress & unrest, besets humanity...rather than co-ordinative love-unisoned related-progressivism internally & externally. Thus, ideological differences are all resolvable in basic science of livingness rather than of force, politics nor economics etc. that breed hates instead of love-equity.
