New JFK theory outlined

Midland resident presents unsubstantiated claim that his father carried out orders to kill president

By David Reul
and Frank Trejo
Staff Writers of The Dallas Morning News

A nervous 29-year-old Midland man on Monday sketched a teary-eyed account of how his father fired the shots that killed President John F. Kennedy in Dallas in 1963.

Roscoe Anthony White carried out the assassination on orders from officials of U.S. agencies, probably including the CIA, according to his son.

But the newest assassination suspect has been dead 18 years, the diary in which he supposedly

admitted the crime is missing, his wife is too sick to respond to media questions, and private investigators refused to release the names of living co-conspirators or dozens of witnesses they say were killed to cover up the conspiracy.

CIA officials strongly denied any involvement and expressed skepticism about the account.

Mr. White's son, Ricky Don White, and more than a half-dozen others presented the assassination claim at a news conference at the JFK Assassination Information Center in the West End Market Place.

The newest assassination ac-

count centers on Roscoe Anthony "Rock" White, who was hired by the Dallas Police Department as a photographer and clerk six weeks before the assassination.

According to the conspiracy account, Mr. White and Oswald knew each other as Marines while stationed in the Philippines in 1958 as part of a mission regarding U-2 spy flights over the Soviet Union. The account states that:

■ Mr. White fired two shots at the presidential motorcade on Nov. 22, 1963, from his position behind a picket fence on the right side of a tree on the grassy knoll. One shot hit Mr. Kennedy in the
