LAB. NO. PC-78378 BX HB

Examination requested by: FBI, Dallas  
Reference: Letter 12/2/63  
Examination requested: Firearms - Spectrographic  
Specimens:

Q188 Bullet from Edwin A. Walker's residence

Results of examination:

The remaining physical characteristics of the bullet, Q188, are the same as those of the bullet and bullet fragments recovered in connection with the assassination of President John F. Kennedy and the same as those of 6.5 millimeter Mannlicher-Carcano bullets manufactured by the Western Cartridge Company. The mutilation of Q188 prevents stating that it is of Western manufacture to the exclusion of all other sources.
