** James Murray used two cameras, one telefoto and one wide angle. The rolls as numbered alternate between the two cameras. Rolls 1,3 Camera 1; Rolls 2,4, etc. Camera 2. However, the individual photos do not alternate. Camera 2 was used much less frequently than 1. The photos on Rolls 2,4,6 and 8 therefore are interspersed with Rolls 1,3,5, & 7 on a more or less random basis. Only the times listed indicate the true sequence. The roll and photo numbers listed are those appearing on the actual films.

Dear Mr. Collier:

Your have requested our consideration of the attached letter of [redacted] concerning the Warren Commission Report on the assassination of President Kennedy. 7c

The Warren Commission made a thorough inquiry and detailed analysis of the facts concerning the assassination. The evidence amply supports the basic conclusions of the Commission. In these circumstances, we see no basis for a new inquiry. The Federal Bureau of Investigation is always open to receive new evidence bearing on the assassination if anyone uncovers valid new evidence. The Department of Justice stands ready to examine any valid and relevant new evidence to insure that the facts surrounding the assassination of President Kennedy are completely uncovered and known to the public.

The Warren Commission gathered a vast amount of material, much of it having only remote connection with the assassination. The bulk of the material that was before the Commission either was published in its 26-volume Hearings or is available to researchers at the National Archives. The relatively small portion which is not now available to the public consists primarily of national security intelligence or investigative reports -- dealing largely with activities far removed from the assassination itself -- which if disclosed might compromise confidential sources or techniques, or in some cases jeopardize the

lives of individuals abroad. Public availability of other information had been delayed pending completion of the prosecution of Jack Ruby, but this information has now been released. All of the Commission material which has not yet been released will be reviewed periodically until all of it has been made available to the public.

I hope this information will be of interest to

Hon. Harold Collier

Dear Congressman Collier,

Being a member of your district, and having recieved help from you in the past, I once again ask for help but now as a political science major I need some specific answers and you are my only resort who will give me an answer.

First of all in listening to some of the opposition shown to the Warren Report and especially to the questions being raised by Mr. Garrison, of New Orleans, I would like to know why this opposition over such a serious issue, as the assassination of an American president which concerns the welfare of two hundred million Americans and the state of world affairs is not taken to heed.

Obviously, the members of the Warren Commission being men of high political and public esteem are respected for their investigations and conclusions of the assassination. However, if some factual opposition is raised concerning the validity of this report, why isn't this opposition itself investigated in an attempt to find the REAL TRUTH.

Also I would like to know how the president got the authority to put all the materials concerning the assassination in the Archives until a year so far distant that it will be irrelevant to anyone but historians. And why does he hide the facts that we citizens have a right to know.

It seems to me that some of the members of the House and Senate, who so radically oppose the Administration on almost every issue have suddenly become silent.

I would appreciate a prompt response, as recieved from you in the past, and would like to thank you for your trouble in answering my questions.

Sincerely yours,
