Mr. Ladd. This is a good question. It can be done through  
the microscope. I will do this later this evening.

Mr. Ladd. Mr. \_\_\_\_\_

Mr. Ladd. Mr. \_\_\_\_\_

Mr. Coffey. Certainly.

Mr. Coffey. And also, did you notice how the glue is all  
glued applied to the box.

Mr. Coffey. Yes, you might say glue was applied well like  
this across to the box.

Mr. Coffey. When I say it's well like this I mean the box  
Mr. Coffey. But if it's glued like this would the original which  
comes to the side off underneath.

Mr. Coffey. No, when you open up one side of cardboard  
it's like this.

Mr. Coffey. Oh, when you open, if you look at the  
original bottom or cardboard you will find this will not be continuous.  
But a continuing bit, the box is made from this box, they have glued it across.  
So when you open it, it's like this continuing underneath.

Mr. Coffey. So, is it possible to make a copy?

Mr. Coffey. Yes.

Mr. Coffey. Well, when we constructed this two dimensions  
and three.

Mr. Coffey. The top, it's like this.

Mr. Coffey. In your opinion, do the robbery relate to  
these two dimensions according?

Mr. Coffey. I personally wouldn't say.

Mr. Coffey. This would be the top of the box, and you  
can see it's continuing like this.

Mr. Coffey. It's like this, so I think this original which  
comes to the side off underneath.
