REC 7

Latent fingerprint developed by Identification Division on brown paper bag recovered at scene and marked "Found next to sixth floor window gun fired from. May have been used to carry gun. Lieutenant J. C. Day" was identified with left index finger impression of Lee Harvey Oswald. In addition, one latent palm print developed on paper bag identified with right palm print of Oswald.

Identification Division determined that latent prints appearing in photograph taken of rifle by Dallas Police Department too fragmentary and indistinct to be of any value for identification purposes. Similar photographs taken by Bureau also failed to produce prints of sufficient legibility for comparison purposes.

Cotton fibers from gun are same colors as cotton fibers composing shirt; however, due to limited number of colors in shirt (3) not possible to state shirt is positively source of these fibers.

Several black cotton, orange yellow cotton and gray black cotton fibers, which matched similar fibers composing Oswald's shirt removed from butt plate submitted rifle. No fibers found on gun which could be associated with green blanket. Single brown viscose fiber and several light green cotton fibers which match similar fibers present in composition of green blanket found on paper bag.

Bullet recovered from stretcher in hospital by Secret Service, and two cartridge cases delivered to Laboratory by SA Drain, Dallas office, identified as being fired by submitted 6.5 millimeter Mannlicher-Carcano rifle delivered by SA Drain.

At 6:04 p. m. today Assistant to the Director Belmont telephonically advised the Dallas Office of the following information:

SUBJECT: ASSASSINATION OF PRESIDENT JOHN F. KENNEDY

FROM: MR. R. H. JEVONS

TO: MR. L. W. CONRAD

DATE: 11/23/63

UNITED STATES GOVERNMENT

BK

Memorandum R. H. Jevons
to Mr. I. W. Conrad

RE: ASSASSINATION OF
PRESIDENT JOHN F. KENNEDY

No latent prints of value developed on revolver, cartridge cases,
clip, inner parts of rifle or unfired cartridge.

Bullet from body of Officer Tippett, a copper-coated lead bullet
of thirty-eight special caliber so badly mutilated there are not sufficient
marks on its surface to permit identification of weapon from which fired.
However, it was determined that Oswald's revolver is among those weapons
producing rifling impressions of the number, type and size as those present
on fatal bullet.

Laboratory report of results to date directed to Dallas Police Department
being hand carried to Dallas by SA Drain tonight.

Mr. Belmont advised SAC Shanklin that he could release the above
information orally to the Dallas Police Department.

ACTION:

None...for information.

~~SECRET~~

For information.

ACTION:

The other items of evidence received from Dallas will be the subject of a separate memorandum.

This cartridge case was not previously examined in the Laboratory but was retained by the Dallas Police Department. It has now been identified as having been fired in the 6.5 mm Mannlicher - Carcano rifle, Serial No. C2766, which was recovered from the Texas Public School Book Depository building. All three cartridge cases which were recovered have now been identified with this weapon. No fingerprints were found on the cartridge case received today.

Among those items of evidence received from the Dallas Office today was a 6.5 mm Mannlicher - Carcano cartridge case which was recovered from the Texas Public School Book Depository building. This cartridge case is reportedly one of three cartridge cases found with the rifle used in the assassination of the President.
