**ASSASSINATION OF PRESIDENT JOHN F. KENNEDY
11/22/63, DALLAS, TEXAS**

Pursuant to the Laboratory's request, the camera used to take the 8mm movies of the assassination has been received in the Laboratory from the Dallas Office. This is a Bell and Howell Zoomatic 8mm motion picture camera and is the property of Abraham Zapruder.

It has been determined that the normal operating speed of this camera is 18 1/3 frames per second. This is somewhat faster than the normal standard speed of 16 frames per second. While, as indicated in earlier memoranda, it is not possible to establish accurately the moment of impact of the first and second bullets, applying the above camera speed of 18 1/3 frames per second to the film pictures of the assassination, the best estimate of the elapsed time between the first and third shots lies between approximately five and six seconds. It is noted that the President's car moves behind a signboard at about the time of the first shot, and the President's movements during this period are not observable. However, he begins to fall forward immediately upon emerging from behind the sign.

ACTION:

Dallas is being appropriately advised by Laboratory report.

**LEE HARVEY OSWALD, aka;
ASSASSINATION OF PRESIDENT
JOHN FITZGERALD KENNEDY,
11/22/63, DALLAS, TEXAS
AFO**

Enclosed herewith is a replica sack made by SAs BARDWELL D. ODUM and GIBBON E. MC NEELY at the Texas School Book Depository building on December 1, 1963, from paper and tape available in the shipping room of the Texas School Book Depository.

The original sack found on the sixth floor of this building on November 22, 1963, and believed to be the sack in which OSWALD carried the rifle into the building on November 22, 1963, was in possession of SAs ODUM and MC NEELY at that time and the replica sack was made to approximately the same size and as nearly as possible in the same manner as the original sack.

This replica sack has been shown to witnesses primarily to convey the true color of the original sack, its color being changed by chemical processes during treatment to develop latent fingerprints.

It is requested that you make a comparison between the replica sack and the original sack to determine if they are made with the same weight and type of paper and gum tape, and if the paper and tape is the same color as, that used in the original sack.

Please return the replica sack to the Dallas Office when your examination is complete.

Q334 Torn portion of a sheet of paper bearing handwritten message beginning "Father on Sept. 20th I was....." and ending "...Of a True Catholic. Thank you" and signed "Fabian McElroy".

Result of examination:

Q334 was searched in the Anonymous Letter File without effecting an identification. Copies have been added to this file for future reference.

No fingerprint cards have been located for persons using the names or aliases Fabian McElroy and Fabion McElroy.

It was concluded that **LEE HARVEY OSWALD, K1 and K5**, did not prepare the questioned handwriting on **Q334**.

Q334 has been photographed and is retained in the Bureau.

Remarks:

It should be noted that this is the first Laboratory report submitted under the above caption, all previous Laboratory reports bearing the caption "ASSASSINATION OF PRESIDENT JOHN F. KENNEDY, 11-22-63, DALLAS, TEXAS," Bufile 62-109060. Future reports relating to subject OSWALD will be under the above caption, Bufile 105-82555. Since a great deal of confusion would result if Q and K numbers are redesignated for purposes of Bufile 105-82555, as a matter of administrative expediency, the Q and K numbers used henceforth in this file will simply be an extension of the numbers used in Bufile 62-109060 and will continue to be numbered consecutively.
