RE: ASSASSINATION OF PRESIDENT JOHN F. KENNEDY

should be furnished to the Bureau in a form suitable for dissemination without any delay.

Bureau records contain no information identifiable with Major John S. Wyllie; however, the following information is contained on G. P. Wyllie (Bureau file 63-7705), who is identical with the individual referred to above. The Bureau has received several prior communications from this individual starting in February, 1959, and the latest being in May of 1963. All of these communications have been highly critical of the Director and the FBI and extremely insulting in tone. You are, therefore, cautioned to be extremely circumspect in your contact with this individual.

NOTE:

In the letter to the Presidential Commission, G. P. Wyllie suggests that there is some connection between Jack Ruby and Lee Oswald occasioned by gambling operators. His letter does not contain much logic; however, he indicates his brother, Major John Wyllie, had told him that Oswald was after Governor Connally of Texas and he indicates his brother, while stationed at Fort Hood, Texas, probably learned of gambling operations and furnished this information to General Walker. Mr. Rankin desired that the Bureau conduct interviews to determine if there is any evidence to support the claims made by Wyllie, particularly the assertion that Oswald was intending to kill Governor Connally rather than the late President.

Bureau file 63-7705 on G. P. Wyllie shows that he initially wrote to the Bureau in February, 1959, and inquired if the Director was related to former President Herbert Hoover. The letter implied that if they were related the Director received favoritism because of the relationship. This communication was answered over Miss Gandy's signature and he was advised there was no relationship. In a letter dated 6-18-62, Wyllie commented that the Director had been head of the FBI 1½ years longer than the age of the Attorney General, Robert Kennedy, and stated "Too damn long in my opinion."

(Note continued from page 2.)

He stated he felt that people no longer think of the Director in regard to the FBI, but rather think of the FBI in regard to the Director and felt there should be a 16-year-limit imposed on the tenure in office by Federal executive officials. This letter was not acknowledged. He last wrote on 5-3-63 and wanted to know the Director's resident address so he could write as a private citizen. He desired to know the Director's views regarding a national police agency among other subjects. This was not acknowledged.

It is quite apparent this individual is a trouble-maker and rabble reuser and may even be suffering from a mental illness; however, in view of the request from the Presidential Commission we have no alternative but to interview him.
