The President's Commission by letter dated 4/3/64 has advised that in evaluating the testimony of Nancy Elaine Perrin, it would also be helpful to the Commission if they were provided information as to how Mrs. Perrin came originally to be interviewed by the FBI.

It is noted that in the report of SA Manning C. Clements at Dallas dated 12/18/63 Mrs. Perrin was initially interviewed at Oakland, California, on 11/30/63 and she was again interviewed on 12/3 and 6/63. It is also indicated in the cover pages of SA Clement's report that Perrin was afforded a polygraph examination on 12/5/63.

By return airtel enclosing letterhead memorandum suitable for dissemination to the President's Commission furnish full details of the requested information as to basis for the initial and subsequent interviews of Perrin. Also include in this letterhead memorandum full details of the polygraph examination afforded Perrin including results and conclusions of the operator and basis therefor as this information would also be of value to the Commission in evaluating Perrin's testimony.

NOTE:

Perrin upon initial interview on 11/30/63 advised that she had worked for Jack Ruby as a bartender waitress at the Carousel Club in July and August, 1961. She stated that she had attended four meetings of a group including Ruby and an Army colonel in Dallas where they discussed sending arms to Cuba. Subsequent investigation and interviews of Perrin and other persons named by her to check out her story indicated that she was an "inveterate" liar and completely unreliable. The polygraph examination results were inconclusive due to her emotional instability and use of drugs but the examiner was of the opinion she had suffered from delusions and that her story concerning arms to Cuba was untrue. The conclusion was based upon emotional responses of the polygraph and discrepancies in her story. As the Commission may eventually subpoena Perrin and it will come to their attention that she was afforded a polygraph examination, Commission should be advised of this and the results of same at this time.

Discussed with Mr. Herndon in the Laboratory.
