SIGHTED—This picture taken in Dallas was made thru a four-power telescope gunsight and is approximately what the assassin of President Kennedy saw when he fired the fatal shots. The auto is at about the same position on Elm-st as was the President's car when the shots were fired. The picture was taken from the same window in the Dallas building and the scope is the same as the one on the gun that slew Mr. Kennedy. This was one of three pictures snapped by the photographer in an interval of less than nine seconds, the time it was estimated it took the sniper to fire his shots at the President.
