WASHINGTON, July 20 -Senator Richard S. Schweiker, a member of the Senate committee investigating the Central Intelligence Agency, recommended today the reopening of an official investigation into the 1963 assassination of President Kennedy to determine whether it was linked to C.I.A. plans to assassinate Premier Fidel Castro of Cuba.

Senator Schweiker, Republican of Pennsylvania, said he had no specific evidence of such a connection but said that the Warren Commission had failed to explore the theory. The Senator linked the omission to the presence on the commission of Allen W. Dulles, then director of the C.L.A.

Mr. Schweiker made the remarks in an interview on the CBS television program "Face the Nation," on which he also made the "Tollowing points:

An aide to Senator Church, said the Idaho Democrat could not be reached for comment because he was working at his cabin in Pennsylvania and it had no telephone.

McCloy Backs Findings

In another CBS interview, a member of the Warren Com-mission, John J. McCloy, reaffirmed his confidence in the panel's central finding. The panel headed by Chief Justice Earl Warren, set up by President Johnson to investigate the assemble of the Lee Harvey Oswald, "acting alone,"
