To: Mexico

Re: **LEE HARVEY OSWALD, aka**
EE - R - CUBADate:
FBI File No.
Lab. No.**April 9, 1964**
105-22125
D-44003 AESpecimens received **4/2/64****Resubmission of Q332**

(Transportes Frontera bus company passenger list covering a trip made by bus No. 340 from Mexico City to Laredo, Texas, 10/2-3/63, bearing the name "Oswald" in the space for seat No. 4)

K73 A form of Transportes Frontera bus line used as a passenger manifest, reservations and ticket sales record, on which the date "2 Oct 1963" has been stamped with the date stamp used by the ticket salesman of that company at the Mexico City terminal, FRANCISCO ALVARADO

K74 One block of forms for Transportes Frontera bus line which allegedly were used in connection with the operations of that company during most of the month of October, 1963

Result of examination:

The date stamp impressions on K73 are similar in size and style to the questioned impressions at the bottom of Q332 but the K73 impressions have a different spacing between the "T" in "OCT" and the "1" in "1963" which indicates a different date stamp was used. The date stamp impressions on K74 are similar in size, style, and spacing to the questioned impressions on Q332 but these questioned impressions lack sufficient significant details to definitely establish whether the same rubber stamp was used on K74 and Q332.

The handwriting, format and appearance of the block of manifests, K74, agrees with the handwriting, format and appearance of Q332. In addition indented writings and extraneous marks were noted on Q332 which indicate that this sheet was originally on top of the present top sheet in K74.

No indentations were found on the present top sheet in K74 which correspond to the writing in black ink on the

On the lines of Q332, the black ink writing on line forty
and immediately below this line or the handwritten notation
in red at the top of Q332 in the wording "Transportes Frontosa."

With respect to the handwritten entries on Q332,
fragmentary portions of these entries were found to be indented
on the present top sheet of K74 except no indented handwriting
was found to correspond to the Oswald entry on line four of
Q332 and the handwritten entries on lines eight and thirteen of
Q332 did not produce any corresponding identifiable indented
impressions on the top sheet of K74.

The submitted evidence is retained.
