Dear Allick,

It has been quite a long time since I wrote to you last. You know I've been rather busy those months (my exams and everything). I will write to you more accurately now.

So my career has been started. I'm a post graduate now and entered the post graduate courses at the Biochemical Department at the Medical Institute. My professor is a brick. He tells me what to read and this is mostly in English (I mean the books).

I like your idea of sending books. I think it's going to be a rare occasion that I shall need a scientific book sent to me. We have had a sad experience with our sendings so far. I'll send you a book soon.

I hope Marina is O.K. now

Eric - 11 - 118

and will have a son soon.

You know what it was for me to hear that you were planning to come to this country. Will it take very long to have everything settled there? Can I do anything for you?

This summer I was to the Crimea. The most exciting experience I had was the underwater sport. I used to go with an aqualung this time. It was wonderful underwater.

I saw Duna and gave her your regard. She is O. K. Still unmarried.

Our friends J-s. always ask me about your letter and give their regards to you.

To. All the best.

Your friend,
Erick.
