Re telephonic conversation between Assistant Director BELMONT and Inspector J. R. MALLEY, Dallas, 11/25/63.

For the information of the Laboratory on November 25, 1963, Dr. JACK G. HARPER, Methodist Hospital, Dallas, Texas, telephonically advised that his nephew WILLIAM ALLEN HARPER, a student at Texas Christian University, but who lives in Dallas at 2378 East Ledbetter Street, was taking photographs during the afternoon of 11/23/63, approximately 5:30 PM near the area just south of the spot where President KENNEDY was assassinated and had found a piece of bone. The bone piece was located approximately 25 feet south of the spot where President KENNEDY was shot. Dr. HARPER stated that his nephew immediately brought the bone to him and he and the Chief Pathologist at Methodist Hospital, Dr. C. E. KERNS, had examined the piece of bone and both definitely feel that it is a piece of human skull. Dr. HARPER felt that in view of the proximity of the place where the piece of bone was located it might possible be part of President KENNEDY's skull.

Inspector MALLEY was instructed by Assistant Director BELMONT to immediately forward this bone material to the FBI Lab for examination.
