Dear Sirs:

I wish to draw your attention to a picture of the President's assassination in the Daily News, Saturday, Nov. 23. The man in the background with hat on leaning against the building, resembles Ruby who killed Oswald, at least, it looks like the man I saw on TV that killed Oswald.

In view of the fact that evidence indicated Oswald planned the killing, maps, drawings, etc. that were found in his apartment, don't you think it feasible that someone would be planted near where the scene took place to "finish the job" in case Oswald failed?

Just passing this thought on to you for what it is worth.
