1 - no marking -

Bot filler —  
numerous —

① Break filler open —  
any thing says now  
(don't have to determine  
what is — if not indicated  
secret code etc)

② fancy list —

Dictation is attached  
for items (284, 324), 373

again between  
weeks 1/13/83

Tom 284

Nothing of significance was noted concerning the two marking devices, stamp pad, ball point pen re-fill, Russian-made fountain pen, pipe cleaner, rubberband, artists brush and cigar-shaped flashlight.

The four bottles of Pentide 400 by Squibb could be used to write or develop a secret ink message →

all out -  
You what they are  
what they are  
to his & 700+ what are  
used in Cuban or  
Russian... 2000  
Hawson

11/27/67  
Omm

Item 324 -

11/27/63  
M

Nothing unusual was noted about the book,  
printed in the Russian language, item 324.

Pages 1-96, 113-176, 193-208 and 225-282 are  
printed on one kind of paper stock that  
fluoresces a light tan under UV light.  
Pages 97-112 exhibit a darker tan-gray color  
when viewed similarly. Pages 177-192  
and 209-224 fluoresce a brilliant blue-white.

The possibility cannot be eliminated  
that one or more pages of the book have  
been treated to serve as sophisticated  
carbon for the preparation of secret ink messages.

111-110 light tan

117-112 brownish tan

113-176 - light tan

177-182 - light blue

193-208 - light tan

209-224 - brownish tan

225-232 yellow tan

glass slide test of representative paper

was not impressive.

Chem-fate on representative paper - neg.

Uit-lan 373

This item is composed of  
miscellaneous Russian and American  
made pharmaceuticals, a few  
thermometers of Russian make and two  
eye-droppers. <sup>Nothing unusual was found concerning these items.</sup>  
There are 31 samples of  
and a German corn, 1 Pfennig.  
pharmaceuticals, each sample of which,  
~~could~~ could be used to prepare and/or  
develop a secret ink message.
