- 1 - Mr. Shroder
- 1 - Mr. Rogge

PURPOSE:

To recommend the attached airtel to all SACs be approved and disseminated.

BACKGROUND:

George Cecil Thomson, a civil engineer of Glendale, California, first came to our attention on 10/3/64, shortly after publication of the President's Commission Report on the assassination. Since that time, Thomson has communicated with us on numerous occasions as well as with prominent individuals in Government and public life; for example, members of the Commission and former Vice President Richard Nixon.

Thomson claims he has discovered some vital evidence proving Lee Harvey Oswald is innocent. We have interviewed him on several occasions and have found him to be "wild eyed," highly nervous and his general behavior suggests he may be suffering from a mental illness.

Since his first contact with us, he has now published a 106-page treatise which he has entitled, "How President Kennedy Really Was Killed" or "The Quest For Truth!" This treatise primarily takes issue with the scientific examinations made with regard to the assassination weapon and the theories concerning the sequence of the shots which killed the President. This treatise has been thoroughly examined by our Laboratory and found to be based on fallacious and incomplete information and is of no value.

Memorandum to Mr. Belmont
RE: ASSASSINATION OF PRESIDENT JOHN FITZGERALD KENNEDY

For additional details concerning Laboratory analysis of Thomson's findings, see Jevons to Conrad memoranda dated 11/27/64 and 12/9/64.

An unusual aspect of Thomson's treatise is that while he is, in effect, criticizing scientific findings of our FBI Laboratory, throughout his treatise he is complimentary of the FBI and, in fact, has dedicated it to us. He has drawn the conclusion that the assassination was part of a plot to eliminate the FBI. It is apparent Thomson does not see the inconsistency of his criticism and praise in the same document.

Los Angeles, by communication dated 12/3/64, advised information was received that Thomson plans to publish his treatise and that initially 10,000 copies will be disseminated. Since it is possible copies will be disseminated to prominent officials and individuals throughout the country who in turn will bring it to the attention of our various field offices, it is felt the field should be appropriately alerted.

RECOMMENDATION:

That the attached airtel to all SACs be approved and disseminated, alerting the field to Thomson.
