

# Bringuier Raps Lane Views on Assassination

A Cuban exile leader in New Orleans said the Warren Report on the assassination of President Kennedy shows 99 per cent of what author Mark Lane has said "is inaccurate and a distortion of the facts."

Dr. ~~John~~ Bringuier, head of the New Orleans delegation of the Cuban Student Directorate, told a group at the University Center at Tulane University last night that he believed Kennedy was shot and killed by Lee Harvey Oswald from the Texas School Book Depository building in Dallas.

DR. BRINGUIER accused Lane, who spoke on the Tulane campus Dec. 7, of citing only the witnesses reinforcing his theory of a conspiracy and of ignoring and concealing the truth by federal agencies, and neglecting to cite other witnesses who might refute his findings.

For instance, Bringuier said, Lane's book does not mention that the driver of the death car said the shots came from the right-rear direction.

"If, as Lane claims, a shot from the front knocked flesh and brain tissue forward in the automobile, this is a new law of physics," said the 33-year-old native of Havana, who fled Cuba in 1960.

In another instance, Dr. Bringuier read the testimony of a 16-year-old Negro, who told the commission he saw what appeared to be some sort of pipe in an upper story window of the depository.

DR. BRINGUIER said forces trying to bring about a revolution in the country are saying anti-Castro Cubans were involved in the assassination.

"They know as long as the people of the United States believe in the institutions of the nation, such as the FBI, they cannot take over. When you begin to doubt your institutions, that's when they will try to take over," said Dr. Bringuier.

He said Oswald was a Trotskyite extremist and a former chairman of the Fair Play for Cuba Committee in New Orleans.
