Item 236-L is in the form of a cube tap which is plugged into a 110-volt outlet. The #252 is a thin pocket transmitter about the size of a large book of paper matches. The #235 is a miniature microphone transmitter about the size of a rectangular lump of sugar. The #272 is an adaptation of the #252 for concealment in automobiles and operation off a car battery. All are FM transmitters and the bid solicitation specifies a frequency range of between 30 to 50 megacycles. On special order, other frequencies may be obtained.
