Warren, Pa.

Dear Mr Hoover;

I am very happy to see Garrison being the investigation
your third rate detective couldn't do about the assassination
of President John Kennedy. I have never written you
about this but of late Congress men and Senators, But
seemingly they accept the Warren Commission which wash
cover up open and shut case against our man Oswald.
I don't, and the American people don't.

I intend just like an answer to some questions on when
Garrison gets that we are forming a Citizens Investigating
Committee to probe the suppression of evidence by the
F.B.I. - the C.I.C. and the Warren Commission
itself. We intend to bring charges against every who
have suppressed evidence.

1. How many shots were fired, and how many guns?
Where was the gun?
2. How could Oswald a mediocre marksman affect
over

have acquired off such a clearly pattern of what was
less than 5.6 seconds a moving target and from a
different angle?

3. How and why was Ruby able to penetrate the Dallas
Police Headquarters sealed off even to Secret Service men?

4. Why were the autopsy notes and the prisoner
interrogation not kept and surprised evidence.

We can hear how there are just a few points that we
as citizens would like answered. They will be answered
if Garrison is not successful then we will have to
proceed against those who surprised the evidence, led
witnesses, cut files, surprised the autopsy report.

We want the truth now and we don't aim to
wait another eight years to get it. There is

a law against surprising evidence, also against

Perjury. I'll await your reply, Amalio Isthakis

could have done a better job for a President,

Good Day
