

I have written to Garrison asking for a copy of the TWX message. We'll see if he responds. Please let me know whether there are any other items in the article that need further support or corrections.

With regard to my Dallas trip, I felt it was extremely fruitful. Beverly is the Babushka I'm sure. She led me to the exact spot where she is standing, described exactly what she did that day, and the clincher was, "She saw the puff of smoke exactly where it was that day." [redacted] was with me and came to the same conclusion. The next step is to track down the file. The men who came to the club and her apartment to confiscate it on Sunday Nov 24, were not local FBI or Dallas police officers. From Beverly's description, I would judge them to be either Texas Rangers or Dallas County Sheriffs. However, they could have been non local FBI or Secret Service agents, or someone more ulterior.

She says her apartment was robbed later and her camera and unexposed film were taken, while other valuables were not. As you reflect on the speed with which they tracked her down, confiscated the film, and buried you must give strong weight to the two men being conspirators. The Secret Service and Nat'l FBI really didn't suppress other important info. The answer is no. (Nix Machine Bell) Why would the

cleaned up the club after Ruby was in jail, and stored away all of the equipment. He now operates a night club in Ft Worth with two of Ruby's girls. [redacted] also knows the photographer's present whereabouts.

Some of what she says, including the films, could be verified by talking to some of the other girls. One of these is Chris Colt. I reserve the right to interview her. Her next was billed in 1960 when I saw her in Dallas as "Chris Colt and her 45's", and it wasn't referring to gun [redacted] is following up on most of [redacted] leads. But [redacted] could use some help.

The next subject is [redacted] or a guy with only one arm and a crippled leg, he is really a man. He is working on 5 projects, any one of which would be "blow the JFK case wide open". How often have you heard that? Even so, developments just in the past few months look very promising.

[redacted] has discussed the case recently with [redacted] is still D.A. and still has jurisdiction over any indictments that might be returned in the [redacted] told [redacted] that he knows there was a conspirator and that there are plenty of guilty people walking

around loose. He said he was happy when the Ruby trial ended so he could "forget about the whole thing".

Coupled with W. C. Wise, Dallas mayor, Jesse Curry and Henry Wade, all of whom now say there was a conspiracy, there might be a possibility of getting something going in Dallas. Blame shifting to the FBI and W. C. but away from the police & D. A. would be an essential part of any move there. Also protection from the Dallas Council would be necessary. I believe it is worth an attempt.

## 2. Bullet Found in Plaza

The enclosed article which Al found in the Dallas Times Herald would seem to confirm his theory - also the object in the photos by Murray and Allen showing Walther and another man picking up something from the drain on the south west of Elm St.

The distance to that drain from the Tenth floor window is about 125 yards. As you remember, Chapman is the source Garrison used to get a bullet was picked up and that it appears in one of the pictures, I have never been convinced that it is a bullet. Recent discoveries lead me to entertain the possibility more seriously. He asked Lt. Day ab

the newspaper article and Day said he was misquoted. However, Al has tracked down the guy in the photos. He turns out to be [redacted] the guy who was guarding the northern end of the triple overpass. [redacted] says a bullet was found out the

3.

[redacted] The guy in the "pick up sequence" of photos may be [redacted]. Chapman has tracked him down and says he is a dead ringer for the guy in the photos. [redacted] was a postal employee at the time, and became suspicious in Garrison's mind in another connection.

[redacted] according to Al, may have been a former FBI agent. Jr. is now working for a public opinion survey outfit in Dallas, name [redacted] and [redacted], with a commercial service and [redacted] call [redacted]

... He would like help in checking out both Robertsons. If Jr. picked up a bullet, it raises several questions:

What was he doing in the Plaza?

Why did Walters allow him to pick up whatever

What happened to the object?

Was, and is [redacted] something other than [redacted] office employee?
