Mr. Ford:

If you would look up at the day that is written on the top of the page, todays date, something bad may pere in your momery. If you don't remember, JFK was shot twalve years ago today.

November 22,1975

And nine days after the assassination, President Lyndon Bains Johnson set up a seven man commission to make a complete investigation and report of the incident. Among the seven, you were chosen to represent the president's best congressenal lawers. But, dispite all the eight months that you and your six fellow members of the commission. dispite the freedom to question all the witnesses, find all the facts and use the fancy know-how involved in a criminal investigation-you lied. I have found flows in many of your exibits in the seventeen-thousand page, twenty-six volume report. I have put a motto on the Warren Commission Report. "It does'nt have to be long; to be right. But it sure helps. "That is about what that pile of lit. adds up to. A pile: of literature. Nothing more.

I have written you many letters on the subject and all thet I have recieved is a "rubber signed form letter" of which more are in publication then the 1975 penny.
