BACKGROUND:

On 1-30-76, Roy telephonically contacted the Director's Office, FBI Headquarters, and was referred to a representative of the External Affairs Division, Interview Room, at which time he furnished the following information:

He stated that he is an attorney and has a client, Fred Newcomb, Van Nuys, California, who has done considerable research on the assassination of President Kennedy. Newcomb recently obtained a photograph from the FBI, which was taken by (FNU) Powell, an Army Intelligence Officer, showing a building from which Lee Harvey Oswald allegedly fired the shot that killed President Kennedy. Roy stated that they have studied this photograph and observed a window on the 6th floor which appears to have a gun barrel protruding from it, and also a couple of windows away on the same floor there appears to be the face of an individual. Roy stated that if their observations are correct and two individuals were in the building at the time of the shooting, this would be significant when compared to the "Dillard" photograph. Roy could not further identify the "Dillard" photograph but stated a comparison of the two would show movement.

Campbell to Moore Memo
Dennis O. Roy

Director. Since 1967, he has made a study of the assassination of President John F. Kennedy and has written and lectured on this subject. Newcomb has corresponded with FBI Headquarters on several occasions requesting information on the assassination which was furnished to him. Newcomb was advised by letter dated 7-17-75, Bufile 62-109060-7224, that the individuals appearing in the windows of the Texas School Book Depository, in the photograph taken by SA James W. Powell, Army Intelligence Corps, were fully identified.

RECOMMENDATION:

That this memorandum be referred to the General Investigative Division for whatever action they deem necessary inasmuch as Roy indicated that he would be recontacting the FBI and was possibly having someone on the "outside" look at this photograph.
