

Добрый гость деревенской
местности вилась наружу
среди ярких красок природы
распространяя в садах и парках
цветы и ароматы. А осенью
погода замедляет свой шаги
и останавливается на полях и
в лесах, чтобы насладиться
красотой пейзажа и счастьем
дыхания воздуха. Весной
погода замедляет свой шаги
и останавливается на полях и
в лесах, чтобы насладиться
красотой пейзажа и счастьем
дыхания воздуха.

1 Sept 1967 - P. H. Muller and
R. M. S. and myself visited a site
of a former limestone quarry
near the village of Kamenec
in the northern part of the
Croatian Republic. The limestone
was derived from a shallow
marine basin, probably connected
with the Adriatic sea.

On the way we observed
a small limestone quarry
near the village of Kamenec
which contained a large number
of fossiliferous limestone blocks.
