

Commission Exhibit No. 195

4. Blank Non Proprietary

Arch. 29.

Other notes:

Map, I suppose you're referring
to mine own. Mine about two miles
of ridge line the ground
(near mine main) the weight of lots
of hills west which was an old
old ridge, and which are being
worn into the top of the ridge.
The ridge running east to
mine is very narrow
and little mine ground except
for the top of it to us.

Mr. Smith, there has been no movement
to have similar action among our
neighbors.

Please everything not yours and
etc.?

With regards to news collection they
of course are right in making their
needs known.

Did you see other newspapers
circulating or asked your friends?

I hope some intelligent
people out there thinking of helping
you more in this by now, like yourself

you.

That about all for now.

Goodbye

George Wm. Smith
Minneapolis
