

1963: Registered Number 2880

the right killer are convicted  
exists in the security arrangements  
in such a conducted ride.

F. K. N. I. E. P.  
The complete evidence of the two bullets having  
themselves in the President is vital. If these  
are not recovered in a convict India gun than the loophole can be  
closed in a conducted ride.

In these two bullets have been recovered and clear  
the hole must be identified along the recent ride.

The bullet subjects have not been recovered then the  
tide level in the orbit never be identified. If  
there is no evidence then it involves planners at tactical and  
strategic levels. A group of plannings domestic or foreign. To  
close the conduct of the evidence of the loophole as this  
is the only way. The first two stages, the killing  
of the President and then of L. L., have been fantastic but we are  
not yet sure what has happened. The third  
stage, present to remove the evidence, may seem so fantastic  
but it is not yet imagined - that it can be safely dismissed  
as impossible. An instructions patch, through the 24 hours  
and only time the decided to extract the vital evidence, would  
enable the most removal but might obtain the complementary  
information if any plan is made. If such an  
attempt were made. At the moment the situation of the United States  
is seen as that of Dallas  
at the moment there is

possible to plan to take up the evidence. As the President's Body is in  
a carrying covered white casket the attempt would plan for the removal  
and removal. Considerable force would be involved as regards persons  
and equipment. The marching forces to install and prevent this would  
not be so much trouble, difficult and strategic in case the tactical atten-  
tion. The best way to take the casket onto a helicopter whose first  
attempt to land the open see and catch the casket well out beyond the  
helicopter down while still inland is  
the best way to do the job, more like checking on all corresponding  
and necessary steps. Hitler rescued Mussolini by  
the same method. The hole of these unwieldy  
attempt to avoid removal of the particular evidence.

REG 5 107060-495  
The unidentified man would seem  
to be wearing boots and not shoes.  
The hole in the leg just discernible below his left trouser  
pocket is the light ("flesh of ankle") effects seen on  
the right hand, in "9" second, correspond to the bizarre light  
hole in the left side of the man just below with D50e 31.106
